

Temp/Tex™

Silicone Coated

Part # 15-320160 (SC-32)

Color Gray

Thickness 15 mils

Finished Square Yard Weight 17 oz

Roll Size 60" W x 50 Yds

Base Material Heat treated "E" grade fiberglass. Material contains no asbestos.

Flame Resistance Material is inherently non-flammable.

<u>Flame-Out</u>	<u>Char Length</u>	<u>Afterglow</u>
1 sec max	.03 in. max	1 sec max

(Per Federal Test Standard 191, Method 5903.2)

Base material is also certified to Defense Department Specification MIL-C-20079

Strength	<u>Warp</u>	<u>Fill</u>	<u>Method</u>
Tensile	250 lb./in.	200 lb./in.	191/5102
Tear	50 lb./in.	25 lb./in.	ASTM D 2263

Temperature Limits Continuous service range of -54°F to +500°F, with intermittent service to 700°F.

Applications Welding screens, curtains, covers, and insulation pads. Material is suitable for outdoor use.
